### PRESS RELEASE

For Immediate Release

## WAGP HAS NO TECHNICAL ISSUES AND AVAILABLE TO TRANSPORT GAS

**SATURDAY JULY 8, 2023, Accra** - The West African Gas Pipeline Company Limited's (WAPCo's), attention has been drawn to press releases issued by GRIDCo citing limited gas supply from WAPCo and from the Electricity Company of Ghana citing a WAPCo technical challenge as contributing to the power challenge experienced in Ghana last night.

WAPCo wishes to set the record straight that we did not have any technical issues and our facilities were, and still are, fully available to deliver gas.

WAPCo transports gas based on its agreements with Gas shippers. These Shippers purchase Gas from Gas suppliers, transport the gas via WAPCo pipelines, and sell the natural gas to Gas Off takers (mainly power companies). When the agreed volume of gas is made available, WAPCo dutifully transports it to the shipper's customers. The challenge yesterday was that the Ghana National Gas Company's plant at Atuabo went down and therefore there was no gas available for WAPCo to transport.

### Editor's Note

The West African Gas Pipeline Company Limited (WAPCo) owns and operates the West African Gas Pipeline (WAGP), a regional infrastructure linking natural gas resources to customers with a growing demand for cleaner and more efficient energy in the West Africa sub-region especially in Ghana. The WAGP is a bi-directional pipeline system with gas supply from both east (Nigeria) and west (Ghana) of the pipeline system.
