

FOR IMMEDIATE RELEASE

HELICOPTER EMERGENCY LANDING IN NKAWKAW

The Volta River Authority has noted with grave concern media publications suggesting that a helicopter which belongs to VRA has emergency landed in Nkawkaw in the Eastern Region.

We would like to state unequivocally that the said helicopter does not belong to VRA and neither does VRA operate aviation services.

Our checks indicate that the helicopter in question belongs to the Volta River Aviation Limited (VRAL) which is registered with the Petroleum Commission.

The mandate of the Volta River Authority is to provide affordable reliable electricity to power economies and add value to lives. Our mandate does not include the provision of aviation services.

The public is strongly advised to disregard any such reports.

The media is also advised to make the necessary enquiries with VRA Corporate Affairs and External Relations Department for accurate information before such publications are made.

We can be reached via email at corpcomm@vra.com or you can contact Francis Kobena Abban (Manager Corporate Communications and Branding) on 0302-218551/ 0245-823734.

Thank you.

NOTE TO EDITORS

The Volta River Authority (VRA) is Ghana's leading power generation company, committed to providing reliable, affordable, and sustainable electricity to drive national development. Established in 1961, VRA operates an integrated power system that includes hydro, thermal, and renewable energy sources, ensuring energy security and efficiency. With a mission to power Ghana's growth, VRA continues to innovate and expand its energy portfolio while prioritizing environmental sustainability, economic progress, and the well-being of communities.
